BROCHURE

Submental Fat
Submental refers to the area underneath your chin. Submental fat accumulation under the chin. This is a common phenomenon and can often occur in individuals who are not otherwise overweight. This area around the neck can be resistant to weight reduction measures.
Excess fat under the chin can also be referred to as a "double chin" because the individual appears to have two chins.

For more information on participating in the Double Chin research study, please ask your doctor, or call:
